'An insight into owning, flying and maintaining the revolutionary American transport aircraft' The Douglas DC-3 Dakota revolutionised air transport in the 1930s and 1940s. Because of its lasting impact on the airline industry - and in particular the part it played in the Second World War - the 'Dak' is widely regarded as one of the most significant transport aircraft ever built. This title describes the Dakota's rugged anatomy. Covers all Dodge Durango and Dakota models, 2001 through 2003 The Douglas DC-3 Dakota revolutionised air transport in the 1930s and 1940s. Because of its lasting impact on the airline industry - and in particular the part it played in the Second World War - the 'Dak' is widely regarded as one of the most significant transport aircraft ever built. Using the RAF Battle of Britain Memorial Flight's ZA947 as its centrepiece, this Haynes Manual describes the Dakota's rugged anatomy and examines its operation from the viewpoints of its owners, aircrew and engineers. Water and light have seduced artists through the years and the quality of these elements at the New Jersey Shore continues to attract artists to this day. Between the late 1800s and 1940, an inspired group of painters were drawn to the New Jersey coastline, forming communities of artists. Jersey Shore Impressionists breaks new ground in the history of American art by recognizing the distinct influence of New Jersey and its Shore on impressionist era American painters. This book establishes a category of impressionist American painters who focused on, or were profoundly influenced by, the landscapes and seascapes of this Shore from Sandy Hook and Highlands to the Barnegat Bay region to Cape May. Not since 1964, nearly 50 years ago, and only once before that in 1938 has there been published a book on painters in New Jersey, says the book's author, Roy Pedersen. Never until now has there appeared a survey of the regional impressionist painters of New Jersey. Jersey Shore Impressionists is produced in conjunction with an exhibition at the Morven Museum & Garden in Princeton, NJ., which seeks to examine how the New Jersey shore was home to artist colonies whose output rivaled that of the better-known colonies of Old Lyme and Cos Cob, Connecticut, and Bucks County, Pennsylvania. In a Foreword, Richard J. Boyle, former director of the Pennsylvania Academy of the Fine Arts, describes the foundation of art colonies, and how they traveled from origins in mid-nineteenth century France to the plein-air attraction of the Jersey Shore's special light. The first art colony at Manasquan forms around 1880 as young artists fresh from European training in Germany, France and Italy begin to arrive, and the book includes work from these artists Will Hicok Low, Theodore Robinson, Albert Grantley Reinhart, Charles Freeman and Caroline Coventry Haynes. The next generation Edward Boulton, Ida Wells Stroud, Julius Golz trained in America, join and form new colonies to paint the unique light as well as the activities of the Shore. The passionate work created by these artists stands as an important, but unsung, chapter of American Impressionism and is celebrated in this book, establishing the important contribution to American art in general, and New Jersey's cultural heritage in particular. The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more. THINGS FALL APART tells two overlapping, intertwining stories, both of which center around Okonkwo, a “strong man” of an Ibo village in Nigeria. The first of these stories traces Okonkwo's fall from grace with the tribal world in which he lives, and in its classical purity of line and economical beauty it provides us with a powerful fable about the immemorial conflict between the individual and society. The second story, which is as modern as the first is ancient, and which elevates the book to a tragic plane, concerns the clash of cultures and the destruction of Okonkwo's world through the arrival of aggressive, proselytizing European missionaries. These twin dramas are perfectly harmonized, and they are modulated by an awareness capable of encompassing at once the life of nature, human history, and the mysterious compulsions of the soul. THINGS FALL APART is the most illuminating and permanent monument we have to the modern African experience as seen from within. Instead of the high-wage, high-profit world of knowledge work, most campus employees—including the vast majority of faculty—really work in the low-wage, low-profit sphere of the service economy. Tenure-track positions are at an all-time low, with adjuncts and graduate students teaching the majority of courses. This super-exploited corps of disposable workers commonly earn fewer than \$16,000 annually, without benefits, teaching as many as eight classes per year. Even undergraduates are being exploited as a low-cost, disposable workforce. Marc Bousquet, a major figure in the academic labor movement, exposes the seamy underbelly of higher education—a world where faculty, graduate students, and undergraduates work long hours for fast-food wages. Assessing the costs of higher education’s corporatization on faculty and students at every level, How the University Works is urgent reading for anyone interested in the fate of the university.
