*Autism Works* Jan 29 2021 People with autism are being left behind today, with only 16 per cent in full-time employment. This inspiring book addresses the lack of understanding of the wonderful contributions people across the autism spectrum can make to the workplace, drawing attention to this vast untapped human resource. Employers who create supportive workplaces can enhance their companies by making use of the talents of people with autism while also helping to produce a more inclusive and tolerant society, and people with autism can themselves benefit materially and emotionally from improved employment opportunities. Packed with real-life case studies examining the day-to-day working lives of people across the autism spectrum in a wide variety of careers, this book provides constructive solutions for both employers seeking to improve their workplaces and for individuals with autism considering their employment options. It dispels popular myths about autism, such as that everyone is good at IT, and crucially tackles the potential job opportunities available across the spectrum, including for those who have no language at all. It also highlights the neglected area of gender differences in the workplace and the costs of autistic females' ability to 'camouflage' their condition. This book is a must-read for parents, employers and adults with autism, and for anyone interested in the present and future of people with autism in the workplace who will benefit from the positive message that employing autistic people is not an act of charity but one that makes sound economic sense.

**Recovery Groups** Sep 17 2022 This book focuses on community self-help and support groups specifically in the context of recovery movements in addiction and mental health care. The idea of groups of recovering people meeting together may seem like a simple one and not one requiring much effort and thought; however, as this book will show, this is not the case. In *Recovery Groups: A Guide to Creating, Leading, and Working with Groups for Addictions and Mental Health Conditions* Linda Kurtz breaks down the recovery movement for addictions and mental health care into three sections. In the first section recovery concepts are broken down into two fields: how they differ and how they come together. The second section focuses on methods of working with independent self-help groups and leadership in support groups. Kurtz touches on the study of helping mechanisms, social climate, group teachings, group structure, and how to use each of these to improve group performance. In the third section of the book, Kurtz examines social and community actions from members involved in Twelve-Step fellowships and consumer survivor organizations. The final section also details programs that provide employment, housing, and mutual support, explaining how to accomplish these goals without a large expense. This book will be useful to students, professional mental health and addiction workers, recovery coaches and peer support specialists, and group members and leaders who are interested in this topic.

**Dare to Lead** Aug 24 2020 #1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based

on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part HBO Max docuseries Brené Brown: Atlas of the Heart! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read Daring Greatly and Rising Strong or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

**The Insider's Guide to Working with Universities** Jan 09 2022 Colleges and universities stand to benefit greatly when businesspeople engage with them, whether through governing boards, alumni associations, consulting arrangements, philanthropy, or other channels. But many businesspeople are frustrated by the way institutions of higher education work--or rather, how they don't work. Why do decisions in universities take so long and involve so many people? Why aren't profit and growth top priorities for colleges? Why can't the faculty be managed like any other employees? Shouldn't alumni have a greater say as they continue to invest in their alma mater? As leaders in higher

education, James W. Dean Jr. and Deborah Y. Clarke have years of experience addressing these questions for a wide range of professionals outside the academy. This book draws on their expertise to offer real-world guidance for businesspeople who work with and seek to improve colleges and universities. Dean and Clarke differentiate and clarify the motivations and structures that make universities unique among American enterprises. And while they acknowledge the challenges that businesspeople often face when working with academic institutions, they explain that understanding the distinct mission of higher education is essential to being able to effect change within these organizations. Presenting insights from interviews with a wide range of stakeholders, Dean and Clarke give succinct and practical advice for working with universities.

Working Minds Jul 15 2022 How to collect data about cognitive processes and events, how to analyze CTA findings, and how to communicate them effectively: a handbook for managers, trainers, systems analysts, market researchers, health professionals, and others. Cognitive Task Analysis (CTA) helps researchers understand how cognitive skills and strategies make it possible for people to act effectively and get things done. CTA can yield information people need—employers faced with personnel issues, market researchers who want to understand the thought processes of consumers, trainers and others who design instructional systems, health care professionals who want to apply lessons learned from errors and accidents, systems analysts developing user specifications, and many other professionals. CTA can show what makes the workplace work—and what keeps it from working as well as it might. *Working Minds* is a true handbook, offering a set of tools for doing CTA: methods for collecting data about cognitive processes and events, analyzing them, and communicating them effectively. It covers both the "why" and the "how" of CTA methods, providing examples, guidance, and stories from the authors' own experiences as CTA practitioners. Because effective use of CTA depends on some conceptual grounding in cognitive theory and research—on knowing what a cognitive perspective can offer—the book also offers an overview of current research on cognition. The book provides detailed guidance for planning and carrying out CTA, with chapters on capturing knowledge and capturing the way people reason. It discusses studying cognition in real-world settings and the challenges of rapidly changing technology. And it describes key issues in applying CTA findings in a variety of fields. *Working Minds* makes the methodology of CTA accessible and the skills involved attainable.
