The Psychology of Family Law Mar 09 2022 Bridges family law and current psychological research to shape understanding of legal doctrine and policy Family law encompasses legislation related to domestic relationships—marriages, parenthood, civil unions, guardianship, and more. No other area of law touches so closely to home, or is changing at such a rapid pace—in fact, family law is so dynamic precisely because it is inextricably intertwined with psychological issues such as human behavior, attitudes, and social norms. However, although psychology and family law may seem a natural partnership, both fields have much to learn from each other. Our laws often fail to take into account our empirical knowledge of psychology, falling back instead on faulty assumptions about human behavior. This book encourages our use of psychological research and methods to inform understandings of family law. It considers issues including child custody, intimate partner violence, marriage and divorce, and child and elder maltreatment. For each topic discussed, Eve Brank presents a case, statute, or legal principle that highlights the psychological issues involved, illuminating how psychological research either supports or opposes the legal principles in question, and placing particular emphasis on the areas that are still in need of further research. The volume identifies areas where psychology practice and research already have been or could be useful in molding legal doctrine and policy, and by providing psychology researchers with new ideas for legally relevant research.

Family Law Reimagined Dec 26 2020 This is the first book to explore the canonical narratives, stories, examples, and ideas that legal decisionmakers invoke to explain family law and its governing principles. Jill Elaine Hasday shows how this canon misdescribes the reality of family law, misdirects attention away from actual problems family law confronts, and misshapes policies.

Disability, Care and Family Law Dec 14 2019 This book explores the series of issues that emerge at the intersection of disability, care and family law. Disability studies is an area of increasing academic interest. In addition to a subject in its own right, there has been growing concern to ensure that mainstream subjects diversify and include marginalised voices, including those of disabled people. Family law in modern times is often based on an "able-bodied autonomous norm" but can fit less well with the complexities of living with disability. In response, this book addresses a range of important and highly topical issues: whether care proceedings are used too often in cases where parents have disabilities; how the law should respond to children who care for disabled parents - and the care of older family members with disabilities. It also considers the challenges posed by the UN Convention on the Rights of Persons with Disabilities, particularly around the different institutional and state responsibilities captured in the Convention, and around decision-making for both disabled adults and children. This interdisciplinary collection - with contributors from law, criminology, sociology and social policy as well as from policy and activist backgrounds - will appeal to academic family lawyers and disability scholars as well as students interested in issues around family law, disability and care.

Landmark Cases in Family Law Nov 12 2019 There are a number of important (landmark) cases in the development of Family Law in England and Wales that deserve detailed examination and lend themselves particularly well to historical examination. Family law cases tend to raise highly controversial issues, often on striking facts, frequently provoking wider social debate and/or extensive publicity. Consequently, the landmark cases chosen for this collection provide considerable scope, not only for doctrinal analysis and explanation of the importance and impact of the decisions, but also for in-depth examination of the social or policy developments that influenced them. The stories behind the cases provide a fascinating insight into the complexities of family life and the drama that can be found in the family courts. In recent years, Family Law has seen enormous changes in law's engagement with the notion of 'family', with the enactment, for example, of the Civil Partnership Act 2004, the Gender Recognition Act 2004 and, more recently, the Human Fertilisation and Embryology Act 2008. As we begin to move forward into the new millennium, this is an excellent time to engage in detailed analyses and 'stock-taking' of the landmark decisions, many of which were decided in the 1970s, and which have shaped modern Family Law. This book provides a series of in-depth studies of the key leading cases, and will be of interest to students and lecturers alike.

Family Law and Personal Life Feb 20 2023 How should our most intimate personal relationships be governed in a liberal society? Should the state encourage a particular model of family life, or support individuals in their pursuit of personal happiness? To what extent do people have the right to

shape the lives of their offspring? This book examines the questions at the heart of family law, rethinking the ideas that shape our understanding of the family as a social unit, its purpose, and the obligations and rights that belong to family members. The book explores how the governance of personal relationships has depended on the exercise of power, from the traditional assumptions of patriarchy, where the male head of the family enjoyed full control over his dependents and descendants, to the ideology of welfarism, where state institutions protect the interests of the vulnerable at the expense of their close relations. Emerging from these conflicting ideologies comes today's rights-based culture, where traditional expectations for behavior within a family sit within a new emphasis on the ability of minorities and traditional dependents to determine the shape of their own lives. Against this background of shifting power relations, the book explores the inter-relationship between the legal regulation of people's personal lives and the values of friendship, truth, respect and responsibility. In doing this, a variety of controversial issues are examined in the light of those values: including the legal regulation of gay and unmarried heterosexual relationships; freedom of procreation; state supervision over the exercise of parenthood; the role of fault in divorce law; the way parenthood is allocated; the rights and responsibilities of parents to control their children; the place of religion in the family; the rights of separated partners regarding property and of separated parents regarding their children. Throughout, the book offers a new picture of the intimacy at the center of personal relationships and argues that only by understanding this intimacy, and its role in human happiness, can we arrive at a true framework for respecting, and governing, the personal lives of other people.

The Unique Family Law in the State of Israel Aug 22 2020 In the State of Israel, the unique family law derives from ancient Jewish law, halakhic traditions, and an extensive legal tradition spanning many centuries and geographic locations. This book examines Israeli family law in comparison with the corresponding law in the United States and illuminates common issues in legal systems worldwide. The Israeli system is primarily controlled by the religious law of the parties. Thus, religious courts were also established and granted enforcement powers equivalent to those of the civil courts. This is a complex situation because the religious law applied in these courts is not always consistent with gender equality and civil rights practiced in civil court. This book seeks to clarify that tension and offer solutions. The comprehensive analysis in this book may serve as a guide for those interested in family law: civil court judges, rabbinical court judges, lawyers, mediators, arbitrators, and families themselves. Topics central to the book include issues subject to modification, the right of a minor to independent status, extramarital relationships, and joint property.

Philosophy, Law and the Family Jun 19 2020 This textbook uses cases in family law to illustrate both traditional philosophical problems in the law as well as problems that are unique to family law. In the beginning chapters family law cases are employed to introduce the reader to philosophical debates about the relationship between law and morals, about how one ought to interpret the U.S. Constitution and its amendments, about the conditions under which individual liberty is justifiably limited by law, about the justification of punishment, and about the justification of remedies and standards of care in determining negligence in tort cases. Later chapters are devoted to contemporary issues unique to family law, including justifiable limits of access to marriage, alternatives to marriage, the rights of children, child custody disputes involving surrogate births, quasi-property disputes involving custody of frozen embryos, and the justifiable limits of the right not to procreate. The book reflects current movements, contemporary debates, and recent research on the philosophical problems in family law.

Family Law in a Changing America Aug 02 2021 Family Law in a Changing America is a new casebook that highlights law and family patterns as they are now, not as they were decades ago. By focusing on key changes in family life, the casebook attends to rising equality and inequality within and among families. The law, formally at least, accords more equality and autonomy than ever before, having repudiated hierarchies based on race,

gender, and sexuality. Yet, as our society has grown more economically unequal, so too have family patterns diverged—with marriage and marital child-rearing becoming a mark of privilege. A number of developments—mass incarceration, the privatization of care, and reproductive technologies—have also contributed to disparities based on race, class, and gender. The casebook reflects the law's continuing emphasis on marriage, but also treats nonmarital families as central. Rather than privilege the marital heterosexual family, the casebook organizes the presentation of the law around 1) adult relationships and 2) parent-child relationships. Professors and students will benefit from: Text that includes dramatic changes in family patterns in contemporary society, including: declining marriage rates, with differential rates based on race and class; increasing rates of nonmarital cohabitation and nonmarital parenting; the use of assisted reproduction and its challenge to biological understandings of parentage; tensions between women's increasing education and employment and the perseverance of the gendered division of labor in families; the inclusion of same-sex couples in marriage and parenthood An approach that decenters the marital heterosexual family and instead is structured around the general topics of adult relationships and parent-child relationships Focus on the scope of family law, including extensive coverage of crucial sites of family regulation, such as the child welfare system, that are traditionally neglected Emphasis on multiple modes of legal interpretation (common law, constitutional, statutory) and multiple actors in the legal system (judges, legislators, lawyers, experts, social workers) Practical problems and exercises, often based on actual cases or events, that illuminate the gaps, tensions, and implications of existing doctrine; some of the problems include postscripts explaining how the issue was resolved by a court or legislature An approach that draws on more recent cases and cutting-edge issues and that includes extensive coverage of assisted reproduction (including IVF, surrogacy, and gamete donation), parentage (including intentional parenthood, functional parenthood, and multi-parent arrangements), adoption, child welfare, and family support

In addition, the book dives into the importance of judicial assistance treaties and laws when understanding the legal issues, including the necessity to have proper service in a foreign country, obtaining evidence overseas, and authenticating foreign public documents.
