Cherif Bassiouni is often referred to as "the father of international criminal law." Every major international criminal law instrument developed in the last forty years, from the Torture Convention to the Statute of the International Criminal Court, bears his hallmark. His writings, diplomatic initiatives, fieldwork, and even litigation have made an unparalleled contribution to the emergence of international criminal law as a distinct discipline within the field of international law. This book contains a collection of fifteen scholarly essays, written by leading experts from around the world, about the theory and practice of modern international criminal law, with a focus on Cherif Bassiouni's unique legacy within this important area. Among the contributing authors are Louise Arbour, UN High Commissioner for Human Rights; Mahnoush Arsanjani, Chief of the UN Office of Legal Affairs Codification Division; Diane Orentlicher, UN Independent Expert on Combating Impunity; Michael Reisman, former President of the Inter-American Commission for Human Rights; Yves Sandoz, Director for International Law of the International Committee of the Red Cross; William Schabas, Member of the Sierra Leone Truth Commission; Brigitte Stern, Advocate for the Bosnians in the World Court's Genocide case; and Prince Hassan bin Talal, first President of the Assembly of States Parties of the International Criminal Court.

Global warming is one of today's greatest challenges. The science of climate change leaves no doubt that policies to cut emissions are overdue. Yet, after twenty years of international talks and treaties, the world is now in gridlock about how best to do this. David Victor argues that such gridlock has arisen because international talks have drifted away from the reality of what countries are willing and able to implement at home. Most of the lessons that policy makers have drawn from the history of other international environmental problems won't actually work on the problem of global warming. Victor argues that a radical rethinking of global warming policy is required and shows how to make international law on global warming more effective. This book

provides a roadmap to a lower carbon future based on encouraging bottom-up initiatives at national, regional and global levels, leveraging national self-interest rather than wishful thinking. Meant primarily for students studying international relations, aspirants of civil services, International Relations Today: Concepts And Applications
