***Coffee Mar 18 2020 Most of us can't make it through
morning without our cup (or cups) of joe, and we're not alone.
Coffee is a global beverage: it's grown commercially on four
continents and consumed enthusiastically on all seven—and
there is even an Italian espresso machine on the International
Space Station. Coffee's journey has taken it from the forests
of Ethiopia to the fincas of Latin America, from Ottoman
coffee houses to "Third Wave" cafés, and from the simple
coffee pot to the capsule machine. In *Coffee: A Global****

History, Jonathan Morris explains both how the world acquired a taste for this humble bean, and why the beverage tastes so differently throughout the world. Sifting through the grounds of coffee history, Morris discusses the diverse cast of caffeinated characters who drank coffee, why and where they did so, as well as how it was prepared and what it tasted like. He identifies the regions and ways in which coffee has been grown, who worked the farms and who owned them, and how the beans were processed, traded, and transported. Morris also explores the businesses behind coffee—the brokers, roasters, and machine manufacturers—and dissects the geopolitics linking producers to consumers. Written in a style as invigorating as that first cup of Java, and featuring fantastic recipes, images, stories, and surprising facts, Coffee will fascinate foodies, food historians, baristas, and the many people who regard this ancient brew as a staple of modern life.

Empire of Cotton Nov 18 2022 WINNER OF THE BANCROFT PRIZE • A Pulitzer Prize finalist that's as unsettling as it is enlightening: a book that brilliantly weaves together the story of cotton with how the present global world came to exist. "Masterly ... An astonishing achievement." —The New York Times The empire of cotton was, from the beginning, a fulcrum of constant global struggle between slaves and planters, merchants and statesmen, workers and factory owners. Sven Beckert makes clear how these forces ushered in the world of modern capitalism, including the vast wealth and disturbing inequalities that are with us today. In a remarkably brief period, European entrepreneurs and powerful politicians recast the world's most significant manufacturing industry, combining imperial expansion and slave labor with new machines and wage workers to make and remake global capitalism.

Development Discourse and Global History Mar 10 2022 The

manner in which people have been talking and writing about 'development' and the rules according to which they have done so have evolved over time. Development Discourse and Global History uses the archaeological and genealogical methods of Michel Foucault to trace the origins of development discourse back to late colonialism and notes the significant discontinuities that led to the establishment of a new discourse and its accompanying industry. This book goes on to describe the contestations, appropriations and transformations of the concept. It shows how some of the trends in development discourse since the crisis of the 1980s - the emphasis on participation and ownership, sustainable development and free markets - are incompatible with the original rules and thus lead to serious contradictions. The Eurocentric, authoritarian and depoliticizing elements in development discourse are uncovered, whilst still recognizing its progressive appropriations. The author concludes by analysing the old and new features of development discourse which can be found in the debate on Sustainable Development Goals and discussing the contribution of discourse analysis to development studies. This book is aimed at researchers and students in development studies, global history and discourse analysis as well as an interdisciplinary audience from international relations, political science, sociology, geography, anthropology, language and literary studies.

France in the World Apr 30 2021 This dynamic collection presents a new way of writing national and global histories while developing our understanding of France in the world through short, provocative essays that range from prehistoric frescoes to Coco Chanel to the terrorist attacks of 2015. Bringing together an impressive group of established and up-and-coming historians, this bestselling history conceives of France not as a fixed, rooted entity, but instead as a place and an idea in flux, moving beyond all borders and frontiers,

shaped by exchanges and mixtures. Presented in chronological order from 34,000 BC to 2015, each chapter covers a significant year from its own particular angle--the marriage of a Viking leader to a Carolingian princess proposed by Charles the Fat in 882, the Persian embassy's reception at the court of Louis XIV in 1715, the Chilean coup d'état against President Salvador Allende in 1973 that mobilized a generation of French left-wing activists. France in the World combines the intellectual rigor of an academic work with the liveliness and readability of popular history. With a brand-new preface aimed at an international audience, this English-language edition will be an essential resource for Francophiles and scholars alike.

What Is Global History? May 20 2020 The first comprehensive overview of the innovative new discipline of global history Until very recently, historians have looked at the past with the tools of the nineteenth century. But globalization has fundamentally altered our ways of knowing, and it is no longer possible to study nations in isolation or to understand world history as emanating from the West. This book reveals why the discipline of global history has emerged as the most dynamic and innovative field in history—one that takes the connectedness of the world as its point of departure, and that poses a fundamental challenge to the premises and methods of history as we know it. What Is Global History? provides a comprehensive overview of this exciting new approach to history. The book addresses some of the biggest questions the discipline will face in the twenty-first century: How does global history differ from other interpretations of world history? How do we write a global history that is not Eurocentric yet does not fall into the trap of creating new centrism? How can historians compare different societies and establish compatibility across space? What are the politics of global history? This in-depth and

accessible book also explores the limits of the new paradigm and even its dangers, the question of whom global history should be written for, and much more. Written by a leading expert in the field, *What Is Global History?* shows how, by understanding the world's past as an integrated whole, historians can remap the terrain of their discipline for our globalized present.

The Napoleonic Wars Oct 13 2019 Austerlitz, Wagram, Borodino, Trafalgar, Leipzig, Waterloo: these are the places most closely associated with the era of the Napoleonic Wars. But how did this period of nearly continuous conflict affect the world beyond Europe? The immensity of the fighting waged by France against England, Prussia, Austria, and Russia, and the immediate consequences of the tremors that spread throughout the world. In this ambitious and far-ranging work, Alexander Mikaberidze argues that the Napoleonic Wars can only be fully understood in an international perspective. France struggled for dominance not only on the plains of Europe but also in the Americas, West and South Africa, Ottoman Empire, Iran, India, Indonesia, the Philippines, Mediterranean Sea, and the Atlantic and Indian Oceans. Taking specific regions in turn, Mikaberidze discusses major political-military events around the world and situates geopolitical decision-making within its long- and short-term contexts. From the British expeditions to Argentina and South Africa to the Franco-Russian maneuvering in the Ottoman Empire, the effects of the French Revolution and Napoleonic Wars would shape international affairs well into the next century. In Egypt, the wars led to the rise of Mehmed Ali and the emergence of a powerful state; in North America, the period transformed and enlarged the newly established United States; and in South America, the Spanish colonial empire witnessed the start of national-liberation movements that ultimately ended imperial

control. Skillfully narrated and deeply researched, here at last is the global history of the period, one that expands our view of the Napoleonic Wars and their role in laying the foundations of the modern world.

Hot Dog Jul 02 2021 Char-grilled or boiled? Sauerkraut or chili? Mustard or ketchup? Vienna Beef or Sabrett? Only these questions could be raised about one of the world's favorite backyard, picnic, ballgame, and street foods—the hotdog. Though nearly two billion hot dogs are consumed by Americans annually in the month of July alone, there is absolutely no consensus on which is the right way to serve up a hotdog. In *Hot Dog*, well known food historian Bruce Kraig recounts the history of this popular “tube steak” from the origin of the sausage 20,000 years ago to its central place in American culture today. Kraig discusses the many brands, including Hebrew National, Pearl, Sabrett, and Vienna Beef, and the regional variations that go along with them—like kosher-style New York dogs loaded with mustard and sauerkraut, New England dogs with Boston Baked Beans, and fully-loaded Chicago style hotdogs, complete with mustard, onion, relish, sport peppers, a dill pickle spear, a dash of celery salt, and tomato slices (but never, ever ketchup). *Hot Dog* covers the other international sausages, like bologna and bockwurst, as well, and explores some of the apocryphal tales of the hotdog in history—like the origin of its name and whether Queen Elizabeth II was truly served hotdogs on a visit to the White House. Packed with tasty facts and recipes, *Hot Dog* reveals the rich history and passionate opinions about this seemingly ordinary food.

Circulations in the Global History of Art Oct 25 2020 The project of global art history calls for balanced treatment of artifacts and a unified approach. This volume emphasizes questions of transcultural encounters and exchanges as circulations. It presents a strategy that highlights the processes and connections among cultures, and also responds to the dynamics at work in the current globalized art world. The editors' introduction provides an account of the historical background to this approach to global art history, stresses the inseparable bond of theory and practice, and suggests a reevaluation of materialist historicism as an underlying premise. Individual contributions to the book provide an overview of current reflection and research on issues of circulation in relation to global art history and the globalization of art past and present. They offer a variety of methods and approaches to the treatment of different periods, regions, and objects, surveying both questions of historiography and methodology and presenting individual case studies. An 'Afterword' by James Elkins gives a critique of the present project. The book thus deliberately leaves

discussion open, inviting future responses to the large questions it poses.

One Long Night Dec 15 2019 "Masterly" -- The New Yorker A Smithsonian Magazine Best History Book of the Year A groundbreaking, haunting, and profoundly moving history of modernity's greatest tragedy: concentration camps For over 100 years, at least one concentration camp has existed somewhere on Earth. First used as battlefield strategy, camps have evolved with each passing decade, in the scope of their effects and the savage practicality with which governments

have employed them. Even in the twenty-first century, as we continue to reckon with the magnitude and horror of the Holocaust, history tells us we have broken our own solemn promise of "never again." In this harrowing work based on archival records and interviews during travel to four continents, Andrea Pitzer reveals for the first time the chronological and geopolitical history of concentration camps. Beginning with 1890s Cuba, she pinpoints concentration camps around the world and across decades. From the Philippines and Southern Africa in the early twentieth century to the Soviet Gulag and detention camps in China and North Korea during the Cold War, camp systems have been used as tools for civilian relocation and political repression. Often justified as a measure to protect a nation, or even the interned groups themselves, camps have instead served as brutal and dehumanizing sites that have claimed the lives of millions. Drawing from exclusive testimony, landmark historical scholarship, and stunning research, Andrea Pitzer unearths the roots of this appalling phenomenon, exploring and exposing the staggering toll of the camps: our greatest atrocities, the extraordinary survivors, and even the intimate, quiet moments that have also been part of camp life during the past century.

Globalization and the Politics of Resistance Sep 23 2020 The paradox of 'globalization' is that it both weakens and activates social forces of resistance. This book establishes the centrality of 'the political' in our understanding of globalization and explores the new 'strategies of resistance' emerging on local, national, regional and global scales. Its impressively wide-ranging set of contributors engage in re-thinking what practices now constitute viable political strategies in the world economy, focusing on popular responses to neoliberal globalization and the rearticulation of society, politics and the state.

Coconut Sep 04 2021 From curries to creamy piña coladas, a delectable global history of the many culinary incarnations of the coconut. The flavor and image of the coconut are universally recognizable, conjuring up sweet, exotic pleasures. Coconut's culinary credentials extend far beyond a sprinkling on a fabulous layer cake or cream pie to include products such as coconut vinegar, coconut sugar, coconut flour, and coconut oil. Complete with recipes, this book explores the global history of coconut from its ancient origins to its recent elevation to super-food status.

Posters Nov 06 2021 From band posters stapled to telephone poles to the advertisements hanging at bus shelters to the inspirational prints that adorn office walls, posters surround us everywhere—but do we know how they began? Telling the story of this ephemeral art form, Elizabeth E. Guffey reexamines the poster's roots in the nineteenth century and explores the relevance they still possess in the age of digital media. Even in our world of social media and electronic devices, she argues, few forms of graphic design can rival posters for sheer spatial presence, and they provide new opportunities to communicate across public spaces in cities around the globe. Guffey charts the rise of the poster from the revolutionary lithographs that papered nineteenth-century London and Paris to twentieth-century works of propaganda, advertising, pop culture, and protest. Examining contemporary examples, she discusses Palestinian martyr posters and West African posters that describe voodoo activities or Internet con men, stopping along the way to uncover a rich variety of posters from the Soviet Union, China, the United States, and more. Featuring 150 stunning images, this illuminating book delivers a fresh look at the poster and offers revealing insights into the designs and practices of our twenty-first-century world.

Pizza May 12 2022 You can pick Chicago deep dish, Sicilian, or New York-style; pan crust or thin crust; anchovies or pepperoni. There are countless ways to create the dish called pizza, as well as a never-ending debate on the best way of

cooking it. Now Carol Helstosky documents the fascinating history and cultural life of this chameleon-like food in *Pizza*. Originally a food for the poor in eighteenth-century Naples, the pizza is a source of national and regional pride as well as cultural identity in Italy, Helstosky reveals. In the twentieth century, the pizza followed Italian immigrants to America, where it became the nation's most popular dish and fueled the rise of successful fast-food corporations such as Pizza Hut and Domino's. Along the way, Helstosky explains, pizza has been adapted to local cuisines and has become a metaphor for cultural exchange. *Pizza* also features several recipes and a wealth of illustrations, including a photo of the world's largest and most expensive pizza—sprinkled with edible 24-karat gold shavings and costing over \$4000. Whether you love sausage and onions on your pizza or unadorned cheese, *Pizza* has enough offerings to satiate even the pickiest of readers.

Soda and Fizzy Drinks Apr 18 2020 An effervescent exploration of the global history and myriad symbolic meanings of carbonated beverages. More than eighty years before the invention of Coca-Cola, sweet carbonated drinks became popular around the world, provoking arguments remarkably similar to those they prompt today. Are they medicinally, morally, culturally, or nutritionally good or bad? Seemingly since their invention, they have been loved—and hated—for being cold or sweet or fizzy or stimulating. Many of their flavors are international: lemon and ginger were more popular than cola until about 1920. Some are local: tarragon in Russia, cucumber in New York, red bean in Japan, and chinotto (exceedingly bitter orange) in Italy. This book looks not only at how something made from water, sugar, and soda became big business, but also how it became deeply important to people—for fizzy drinks’ symbolic meanings are far more complex than the water, gas, and sugar from which they are made.

Food In Global History Jun 01 2021 Social scientists study food in many different ways. Historians have most often studied the history of specific foods; anthropologists have emphasized the role of food in religious rituals and group identities; sociologists have looked primarily at food as an indicator of social class and a factor in social ties; and nutritionists have focused on changing patterns of

consumption and applied medical knowledge to study the effects of diet on public health. Other scholars have studied the economic and political connections surrounding commerce in food. Here these perspectives are brought together in a single volume.

Rising Life Expectancy Jul 22 2020 This book traces the global history of rising life expectancy in the last 200 years.

Avocado Apr 11 2022 The avocado is arguably the most iconic food of the twenty-first century. In less than one-hundred years, it has gone from a little-known regional delicacy to global embrace and social media fame. This may seem like an astounding trajectory for a fruit that isn't sweet, that gets bitter when it is cooked, and has perhaps the oddest texture of any fruit or vegetable. But it is precisely the avocado's contradictions that have contributed to its ascent: the idea that this rich and delicious fruit is also healthy despite being fatty and energy-dense grants it unicorn status with modern eaters, especially millennials. Through lively anecdotes, colorful pictures, and delicious recipes, Jeff Miller explores the meteoric rise of the avocado, from its coevolution with the megaherbivores of the Pleistocene to its acceptance by the Spanish conquistadors in Mexico, to its current dominance of food consumers' imaginations.

Hummus Sep 16 2022 Complete with recipes, a mouthwatering look at the complicated origins and rise of the world's favorite garbanzo bean spread and dip. This is a global history of hummus bi-tahina, the delicious combination of chickpeas, tahini, lemon, and garlic that we know and love as hummus. The story begins in the medieval kitchens of the Near and Middle East and culminates with hummus's rise in popularity in the Western world at the end of the twentieth century. This book also addresses the

international controversy over ownership of the dish and illustrates the extent to which hummus has been embraced by Western food culture today. Though other Mediterranean dishes have become popular in the West, none can be compared to hummus, which can be found in any supermarket and in vast numbers of eating establishments. Hummus has become a global phenomenon and our very favorite dip.

Moonshine Feb 26 2021 You might think moonshine only comes from ramshackle stills hidden away in the Appalachian Mountains, but the fact of the matter is we've been improvising spirits all around the world for centuries. No matter where you go, there is a local bootleg liquor, whether it's bathtub gin, peatreek, or hjemmebrent. In this book, Kevin R. Kosar tells the colorful and, at times, blinding history of moonshine, a history that's always been about the people: from crusading lawmen and clever tinkerers to sly smugglers and ruthless gangsters, from pontificating poets and mountain men to beleaguered day-laborers and foolhardy frat boys. Kosar first surveys all the things we've made moonshine from, including grapes, grains, sugar, tree bark, horse milk, and much more. But despite the diversity of its possible ingredients, all moonshine has two characteristics: it is extremely alcoholic, and it is, in most places, illegal. Indeed, the history of DIY distilling is a history of criminality and the human ingenuity that has prevailed out of officials' sights: from cleverly designed stills to the secret smuggling operations that got the goods to market. Kosar also highlights the dark side: completely unregulated, many moonshines are downright toxic and dangerous to drink. Spanning the centuries and the globe, this entertaining book will appeal to any food and drink lover who enjoys a little mischief.

Dining Out Oct 05 2021 A global history of restaurants

beyond white tablecloths and maître d's, Dining Out presents restaurants both as businesses and as venues for a range of human experiences. From banquets in twelfth-century China to the medicinal roots of French restaurants, the origins of restaurants are not singular—nor is the history this book tells. Katie Rawson and Elliott Shore highlight stories across time and place, including how chifa restaurants emerged from the migration of Chinese workers and their marriage to Peruvian businesswomen in nineteenth-century Peru; how Alexander Soyer transformed kitchen chemistry by popularizing the gas stove, pre-dating the pyrotechnics of molecular gastronomy by a century; and how Harvey Girls dispelled the ill repute of waiting tables, making rich lives for themselves across the American West. From restaurant architecture to technological developments, staffing and organization, tipping and waiting table, ethnic cuisines, and slow and fast foods, this delectably illustrated and profoundly informed and entertaining history takes us from the world's first restaurants in Kaifeng, China, to the latest high-end dining experiences.

Based on the scholarship of a global team of diverse authors, this wide-ranging handbook surveys the history and current status of pro-women thought and activism over millennia. The book traces the complex history of feminism across the globe, presenting its many identities, its heated debates, its racism, discussion of religious belief and values, commitment to social change, and the struggles of women around the world for gender justice. Authors approach past understandings and today's evolving sense of what feminism or womanism or gender justice are from multiple viewpoints. These perspectives are geographical to highlight commonalities and differences from region to region or nation to nation; they are also chronological suggesting change or continuity from the ancient world to our digital age. Across five parts, authors delve into topics such as colonialism, empire, the arts, labor activism, family, and displacement as the means to take the pulse of feminism from specific vantage points highlighting that there is no single feminist story but rather multiple portraits of a broad cast of activists and thinkers. The Greeks Jun 13 2022
A sweeping history of the Greeks, from the Bronze Age to today
More than two thousand years ago, the Greek city-states, led by Athens and Sparta, laid the

foundation for much of modern science, the arts, politics, and law. But the influence of the Greeks did not end with the rise and fall of this classical civilization. As historian Roderick Beaton illustrates, over three millennia Greek speakers produced a series of civilizations that were rooted in southeastern Europe but again and again ranged widely across the globe. In *The Greeks*, Beaton traces this history from the Bronze Age Mycenaeans who built powerful fortresses at home and strong trade routes abroad, to the dramatic Eurasian conquests of Alexander the Great, to the pious Byzantines who sought to export Christianity worldwide, to today's Greek diaspora, which flourishes on five continents. The product of decades of research, this is the story of the Greeks and their global impact told as never before.

1688: A Global History Jan 28 2021 "A totally absorbing book...imaginative and erudite, full of startling juxtapositions and flashes of real perception."—Jonathan D. Spence John E. Wills's masterful history ushers us into the worlds of 1688, from the suicidal exaltation of Russian Old Believers to the ravishing voice of the haiku poet Basho. Witness the splendor of the Chinese imperial court as the Kangxi emperor publicly mourns the death of his grandmother and shrewdly consolidates his power. Join the great caravans of Muslims on their annual pilgrimage from Damascus and Cairo to Mecca. Walk the pungent streets of Amsterdam and enter the Rasp House, where vagrants, beggars, and petty criminals labored to produce powdered brazilwood for the dyeworks. Through these stories and many others, Wills paints a detailed picture of how the global connections of power, money, and belief

were beginning to lend the world its modern form. "A vivid picture of life in 1688...filled with terrifying violence, frightening diseases...comfortingly familiar human kindnesses...and the intellectual achievements of Leibniz, Locke, and Newton."—Publishers Weekly

Bandung, Global History, and International Law Nov 13 2019 In 1955, a conference was held in Bandung, Indonesia that was attended by representatives from twenty-nine nations. Against the backdrop of crumbling European empires, Asian

and African leaders forged new alliances and established anti-imperial principles for a new world order. The conference came to capture popular imaginations across the Global South and, as counterpoint to the dominant world order, it became both an act of collective imagination and a practical political project for decolonization that inspired a range of social movements, diplomatic efforts, institutional experiments and heterodox visions of the history and future of the world. In this book, leading international scholars explore what the spirit of Bandung has meant to people across the world over the past decades and what it means today. It analyzes Bandung's complicated and pivotal impact on global history, international law and, most of all, justice struggles after the end of formal colonialism.

Firearms Nov 25 2020 This book is a history of firearms across the world from the 1100s up to the 1700s, from the time of their invention in China to the time when European firearms had become clearly superior. It asks why it was the Europeans who perfected firearms when it was the Chinese who had invented them, but it answers this question by looking at how firearms were used throughout the world.

'Revelatory and instructive... [a] beautifully written and accessible book' The Times For decades, the West has dismissed Maoism as an outdated historical and political phenomenon. Since the 1980s, China seems to have abandoned the utopian turmoil of Mao's revolution in favour of authoritarian capitalism. But Mao and his ideas remain central to the People's Republic and the legitimacy of its

Communist government. With disagreements and conflicts between China and the West on the rise, the need to understand the political legacy of Mao is urgent and growing. The power and appeal of Maoism have extended far beyond China. Maoism was a crucial motor of the Cold War: it shaped the course of the Vietnam War (and the international youth rebellions that conflict triggered) and brought to power the murderous Khmer Rouge in Cambodia; it aided, and sometimes handed victory to, anti-colonial resistance movements in Africa; it inspired terrorism in Germany and Italy, and wars and insurgencies in Peru, India and Nepal, some of which are still with us today - more than forty years after the death of Mao. In this new history, Julia Lovell re-evaluates Maoism as both a Chinese and an international force, linking its evolution in China with its global legacy. It is a story that takes us from the tea plantations of north India to the sierras of the Andes, from Paris's fifth arrondissement to the fields of Tanzania, from the rice paddies of Cambodia to the terraces of Brixton. Starting with the birth of Mao's revolution in northwest China in the 1930s and concluding with its violent afterlives in South Asia and resurgence in the People's Republic today, this is a landmark history of global Maoism.

Studies on a Global History of Music Jan 16 2020 The idea of a global history of music may be traced back to the Enlightenment, and today, the question of a conceptual framework for a history of music that pays due attention to global relationships in music is often raised. But how might a historical interpretation of those relationships proceed? How should it position, or justify, itself? What would 'Western music' look like in an account of music history that aspires to be truly global? The studies presented in this volume aim to promote post-European historical thinking. They are based on the idea that a global history of music cannot be one single,

hegemonic history. They rather explore the paradigms and terminologies that might describe a history of many different voices. The chapters address historical practices and interpretations of music in different parts of the world, from Japan to Argentina and from Mexico to India. Many of these narratives are about relations between these cultures and the Western tradition; several also consider socio-political and historical circumstances that have affected music in the various regions. The book addresses aspects that Western musical historiography has tended to neglect even when looking at its own culture: performance, dance, nostalgia, topicality, enlightenment, the relationships between traditional, classical, and pop musics, and the regards croisés between European, Asian, or Latin American interpretations of each other's musical traditions. These studies have been derived from the Balzan Musicology Project Towards a Global History of Music (2013-2016), which was funded by the International Balzan Foundation through the award of the Balzan Prize in Musicology to the editor, and designed by music historians and ethnomusicologists together. A global history of music may never be written in its entirety, but will rather be realised through interaction, practice, and discussion, in all parts of the world.
