Addressing Challenging Moments in Psychotherapy Apr 18 2020 "This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range

of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--

Confessions of an Air Traffic Controller Mar 30 2021 An autobiography of a young impertinent FAA controller in the seventies culminating in the

PATCO strike of 1981, and his subsequent adventures and exploits in aviation through the years. An entrepreneur, educator, author, radio talk show host, motivational speaker, master of ceremonies, aircraft builder, risk-taker and air race pilot, world record holder, corporate pilot, and airline instructor are just some of his unique accomplishments. With his involvement with Bill Phelps' Airline Ground Schools as an instructor and later as president, Dan lead a premier cadre of retired airline captains responsible for the worldwide training of more than 59,000 pilots and aircraft dispatchers. His innovations in aviation education and training materials are admired by many. Danny earned the moniker Mr. Lucky after walking away from a 200 mph crash at the National Championship Air Races in Reno, Nevada, in 1983. His miraculous survival is attributed to the structural integrity of his Burt Rutan-designed AMSOIL Racer and the stronger-than-steel composite materials used in its construction. In 1990, he won the Gold at Reno and retired from pylon air racing after fifteen years of competition. Two of his race planes now hang in museums. Now retired, Danny reflects on his challenges, accomplishments, and some funny stories along the way.

Internal Combustion Engines Jul 22 2020 This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC

engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Fairy Tale Interrupted Jul 02 2021 Working Girl meets What Remains in this New York Times bestselling, behind-the-scenes story of an unlikely friendship between America's favorite First Son, John F. Kennedy Jr. and his personal assistant, a blue-collar girl from the Bronx. Featured in the documentary I Am JFK Jr.! From the moment RoseMarie Terenzio unleashed her Italian temper on the entitled nuisance commandeering her office in a downtown New York

PR firm, an unlikely friendship bloomed between the blue-collar girl from the Bronx and John F. Kennedy Jr. Many books have sought to capture John F. Kennedy Jr.'s life. None has been as intimate or as honest as Fairy Tale Interrupted. Recalling the adventure of working as his executive assistant for five years, RoseMarie portrays the man behind the icon—patient, protective, surprisingly goofy, occasionally thoughtless and self-involved, yet capable of extraordinary generosity and kindness. She reveals how he dealt with dating, politics, and the paparazzi, and describes life behind the scenes at George magazine. Captured here are her memories of Carolyn Bessette, how she orchestrated the ultra-secretive planning of John and Carolyn's wedding on Cumberland Island—and the heartbreak of their deaths on July 16, 1999, after which RoseMarie's whole world came crashing down around her. Only now does she feel she can tell her story in a book that stands as “a fitting personal tribute to a unique boss . . . deliriously fun and entertaining” (Kirkus Reviews).
