**Biology of Marine Mammals** May 19 2020 Taking an integrated approach to the biology of marine carnivores, cetaceans, and sirenians, twenty-two prominent researchers compare marine mammals with one another and with terrestrial mammals, providing a framework for fundamental biological and ecological concepts. They describe functional morphology, sensory systems, energetics, reproduction, communication and cognition, behavior, distribution, population biology, and feeding ecology. They also detail the physiological adaptations—for such activities and processes as diving, thermo-regulation, osmoregulation, and orientation—that enable marine mammals to exploit their aquatic environment.

**Stalking Sociologists** Jul 01 2021 Until recent years, the Federal Bureau of Investigation enjoyed an exalted reputation as America's premier crime-fighting organization. However, it is now common knowledge that the FBI and its long-time director, J. Edgar Hoover, were responsible for the creation of a massive internal security apparatus that undermined the very principles of freedom and democracy they were sworn to protect. While no one was above suspicion, Hoover appears to have held a special disdain for sociologists and placed many of the profession's most prominent figures under surveillance. In *Stalking Sociologists*, Mike Forrest Keen offers a detailed account of the FBI's investigations within the context of an overview of the history of American sociology. This ground-breaking analysis history uses documents obtained through the Freedom of Information Act. Keen argues that Hoover and the FBI marginalized sociologists such as W. E. B. Du Bois and C. Wright Mills, tried to suppress the development of a Marxist tradition in American sociology, and likely pushed the mainstream of the discipline away from a critique of American society and towards a more quantitative and scientific direction. He documents thousands of man-hours and millions of dollars dedicated to this project. Faculty members of various departments of sociology were recruited to inform on the activities of their colleagues and the American Sociological Association was a target of FBI surveillance. Keen turns sociology back upon the FBI, using the writings and ideas of the very sociologists Hoover investigated to examine and explain the excesses of the Bureau and its boss. The result is a significant contribution to the collective memory of American society as well as the accurate history of the sociological discipline. "This ground-breaking book documents in meticulous detail decades of harassment and surveillance of major American sociologists by the FBI. The misuse of power...will outrage all Americans a

*In Search of an America* May 11 2022 Born in Hungary, author Gabor Bethlenfalvay spent his early childhood under privileged circumstances that he remembers as his Garden of Eden. It was a paradise until the end of World War II. He tells of the events of joy and of tragedy in his life before and after the war in his Xlibris publication: *In Search of an America: An Introvert on the Road*. In this tale of the road' the author relives how he and his family fled west, just before the Red Army overran his hometown, to end up in a small village in Bavaria. There, six years of exile were spent absorbing a classical education amid the rubble of post-war Germany, until emigration to the United States became possible. Assembly lines in Chicago and in Omaha were the author's first introduction to the New World, until he found his path to Military Service. He became a paratrooper and an officer but decided to return to school to study physics. In spite of an advanced degree, doubts about his vocation pulled him back into the Army. The war in Vietnam finally impelled him to resign his commission for good and to strike out for California with his young family to study biology, a decision that led to a doctorate and a research career exploring the web of life in the soil. The repeated back-and-forth between academia and the military and between Europe and the USA helps him explore and compare religious, political, sociological and scientific attitudes and patterns of thinking in the Old and New Worlds. He learns to view his new home with critical detachment. A candid look into a colorful life journey during one of history's most tumultuous times, *In Search of an America: An Introvert on the Road* chronicles how one man finally realized that the long road that led him to the fog-shrouded mountain outside his study window in San Luis Obispo was all part of his search for his personal utopia, 'an america,' that of his childhood dreams.

In this volume, Delone and Krainov present their and others' theoretical description of the process occurring in atoms under conditions of multi-photon impacts, in particular, the shift, broadening, and mixing of electronic states which complicate the interpretation of spectra. The topics of individual chapters include tunneling ionization, above-threshold ionization, ionization of multiply charged ions, resonance-enhanced ionization, super-intense radiation fields, and properties of Rydberg states in strong fields.
