The #1 English-language bestseller in China--the book that is shaping China's planning and policy for the future. A "gray rhino" is a highly probable, high impact yet neglected threat: kin to both the elephant in the room and the improbable and unforeseeable black swan. Gray rhinos are not random surprises, but occur after a series of warnings and visible evidence. The bursting of the housing bubble in 2008, the devastating aftermath of Hurricane Katrina and other natural disasters, the new digital technologies that upended the media world, the fall of the Soviet Union...all were evident well in advance. Why do leaders and decision makers keep failing to address obvious dangers before they spiral out of control? Drawing on her extensive background in policy formation and crisis management, as well as in-depth interviews with leaders from around the world, Michele Wucker shows in The Gray Rhino how to recognize and strategically counter looming high impact threats. Filled with persuasive stories, real-world examples, and practical advice, The Gray Rhino is essential reading for managers, investors, planners, policy makers, and anyone who wants to understand how to profit by avoiding getting trampled. YFM660F Grizzly 660 (2002-2008) The black and the white rhinoceros have become flagship species for international conservation. They are significant not only for the continuation of a major evolutionary heritage, but also as symbols for the protection of African savannahs. The battle for the survival of these species has been marked by some notable successes and sadly, many failures, and the situation is still critical. The international horn trade ban and the domestic bans imposed in most traditional user states have driven the trade further underground, in some cases inflating prices and making illegal dealing even more lucrative. This Plan is aimed at donors, government and non-government organizations, and all those involved in rhino conservation. It outlines the actions and strategies needed to catalyse support for these majestic animals, and help secure their future in sub-Saharan Africa. The overall conclusion is that, given the political will, stability and adequate field expenditure, rhinos can be conserved in the wild. A prehistoric corpse entombed within an Arctic glacier, crying tears of blood. A jungle island overrun by rabid primates - escapees from a research laboratory's Hot Zone. A massive seaplane hidden beneath a mountain, packed with a Nazi cargo of mind-blowing evil. A penniless orphan kidnapped from an African slum, holding the key to the world's survival. Four terrifying journeys. One impossible path. Only one man to attempt it. Will Jaeger. The Hunter. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. One of the responsibilities of every dog or cat owner is that of coat care. There are many and varied coat types and there is a vast difference between the time it takes to groom a Doberman and an Old English Sheepdog, a Siamese and a Persian cat. You could become three tons of thick-skinned, snorting hard-charging rhinoceros. It is time to go get the life you want. From the master of adventure behind the classic Death in the Long Grass, former big-game hunter Peter Hathaway Capstick now turns from his own exploits to those of some of the greatest hunters of the past with Death in the Silent Places. With his characteristic color and flair, Capstick recalls the extraordinary careers of men like Colonel J.H. Patterson and Colonel Jim Corbett, who stalked legendary man-eaters through the silent darkness on opposite sides of the

world; men like Karamojo Bell, acknowledged as the greatest elephant hunter of all time; men like the valiant Sasha Siemel, who tracked killer jaguars through the Matto Grosso armed only with a spear. With an authenticity gained by having shared the experiences he writes of, Capstick eloquently recreates the acrid taste of terror in the mouth of a man whose gun has jammed as a lion begins his charge, the exhilaration of tracking and finding a long-sought prey, the bravery and even nobility of performing under circumstances of primitive and savage stress, with death all around in the silent places of the wilderness. After the tragic sinking of a cargo ship, one solitary lifeboat remains bobbing on the wild, blue Pacific. The only survivors from the wreck are a sixteen-year-old boy named Pi, a hyena, a zebra with a broken leg, a female orang-utan - and a 450-pound Royal Bengal tiger. Since it was first published in 2002, *Life of Pi* has entered mainstream consciousness and remains one of the most extraordinary works of fiction in recent years. In October 2005 Canongate launched a competition with *The Times* to find an artist to illustrate Yann Martel's international bestseller. Soon the competition expanded as *The Globe and Mail* and *The Age* newspapers also launched a search in Canada and Australia. From thousands of entries, Croatian artist Tomislav Torjanac was chosen as the illustrator for this new edition of *Life of Pi*. Now readers can enjoy this extraordinary tale with his glorious colour illustrations. All over the world, corporate executives are under increasing pressure to resist a new breed of competitors: the digital innovators disrupting long-established business models and capturing markets as a result. The old world is made up of enormous and incumbent market-leading companies known as "rhinos" while the new world is ruled by digitally native, innovative and disruptive companies known as "unicorns." And the success of the unicorns doesn't always make sense if you're going by the old rules. In the face of widespread "digital transformation" in virtually every industry, the question becomes: how can incumbent companies and executives keep their edge against their new competitors? In *From Rhino to Unicorn*, Victor Orlovski and Vladimir Korovkin combine their personal experience with analyses of more than 40 case studies to answer that question. Drawing on their combined decades of experience in both business and academia, Orlovski and Korovkin break down: -The eight key areas where unicorns have an advantage over rhino companies -Why most rhinos' attempts at digital transformation fail -The strategies successful companies use to navigate digital transformation -The seven most common mental "traps" companies fall into when trying to transform -The proven roadmap for rhino-to-unicorn transitions (used by major corporations like Sberbank) And much more. While many business books discuss innovation and disruption, few can match the depth of academic and economic analysis offered by *From Rhino to Unicorn* - and even fewer can offer actual strategies for established companies to thrive in the brave new world of digital transformation. "It's hard to drain the swamp when you're up to your rear end in alligators." -Bill Wilson "Be sober, be vigilant; because your adversary the devil, as a roaring lion, walketh about, seeking whom he may devour." -The Apostle Peter (1 Peter 5:8 KJV) The first rule of living in the jungle of real life is you have to survive, which means staying off the lunch menu. The rhinoceros (rhino) is a great example. It lives in contented solitude that does not completely exclude, but selects its companions carefully. It does not rely on the herd for protection. It is not the fastest, strongest, tallest or smartest animal in the wild. It stays off the lunch menu due to its protective skin that is over one-half inch thick. It is extremely difficult to penetrate. Teflon is a slick coating that has transformed the world due to its nonstick properties, thus The Teflon Rhino. The rhino's skin is slick and thick. It is not swayed by the crowd, coerced by opinion, or motivated by popularity. It does not flinch in the face of adversity or succumb to the fear of the unknown. My greatest attribute as a leader and a citizen of the real world was birthed in me as an abandoned child. I am a survivor, and I have written this book as a survival manual for you. I pray that the survival skills I have learned over six decades of life and ministry will help navigate you through the trials, heartaches, adversity and attacks that real life will bring into your jungle. Whether or not you believe it, you can be a survivor of the rarest kind. Like me, you can be a Teflon Rhino.
