Customer-driven Manufacturing Feb 14 2020 Customer-driven manufacturing is the key concept for the factory of the future. The markets for consumer goods are nowadays marked by an increase in variety, while at the same time showing steadily decreasing product life-cycles. In addition, tailoring the product to the customer's needs is becoming increasingly important in quality improvement. These trends are resulting in production in small batches, driven by customer orders. Customer-driven Manufacturing adopts a design-oriented approach, splitting the realisation of customer-driven manufacturing into three main steps. Firstly, you must understand the primary process of your business. The second step is to analyse and re-design the management and control of the organisation. Finally, the organisation's information system must

be analysed and redesigned.

Cross-Cultural Design for Healthy Ageing Apr 29 2021 This book is based on many years of research and practical pedagogical experiences around cross-cultural and multidisciplinary design for healthy ageing. It provides important insight into origins, design, implementation, and impact of cross-cultural design student study tours, and takes an original approach by foregrounding pedagogical practice for exploring healthy ageing solutions. The populations of Australia and many other countries in the Asia Pacific region are ageing. The next few decade will see up to half of the population in many countries represented by the over 65s. The impact of this change in population balance will be profound and it represents a potential global shift in design for society. This will challenge designers, planners and health care professionals to develop solutions to better meet the needs and harness the capacity of our growing and diversifying populations of older citizens, in relation to housing, community interaction and co-operation, health and well-being, and the integration new technologies. Different disciplinary and cultural perspectives can be a means to create new ideas and approaches that provide a deeper understanding of the needs of the global ageing population. This book examines some of the challenges associated with ageing in multi-cultural societies. We explore some of the major issues facing society in the area of 'healthy ageing' and propose a method of working with cross-disciplinary groups of health practitioners, designers, architects and cultural practitioners. Through case-studies of a series of workshops run in China and Singapore with Australian, Chinese and Singaporean students, we review the benefits of this approach and provide a framework for engaging designers, planners and health professionals in the process of creating

new design solutions for the growing global ageing population. This book is especially useful for academics and educators in the design and health areas. Design professionals in urban, architectural, interior, industrial, graphic, multimedia, fashion, interaction, service and user-experience design will find many useful ideas. Health professionals across the range of disciplines, including medical practitioners, nurses, physiotherapists, other allied health professionals and carers practising in different settings such as aged-care facilities, government offices and others will also find it useful. It also provides insights and ideas for innovators, businesses and everybody interested in exploring design and innovation for an ageing population, which has been identified as a growing market. It may also be useful to anyone who wants to understand how to provide care for ageing members of the family and friends, or for anyone who wants to better understand issues around their own ageing. Although there are many articles and books on social design, there has been very little work on the methods to combine the discipline areas of Health and Design in the creation of concepts and artefacts around design for healthy ageing. There is also very little on the understanding of 'Cross-cultural Empathy' in design. This book takes an original approach to 'Design for Healthy Ageing' by combining not only a varied discipline group of practitioners from design and health but also presenting cross-cultural methods to deal with issues associated with the social cause. The primary readership will include professionals and academics in the areas of cross-cultural design, health, ageing and related policies, government institutions and gerontologists. It will also be of interest to tutors and lecturers across design practice internationally, and the case studies are useful for those with a specific geographical interest (Australia, Singapore, China), including clinicians, carers and other

health professionals in those areas.

Nokia Firewall, VPN, and IPSO Configuration Guide Nov 17 2022 "While Nokia is perhaps most recognized for its leadership in the mobile phone market, they have successfully demonstrated their knowledge of the Internet security appliance market and its customers requirements." --Chris Christiansen, Vice President, Internet Infrastructure and Security Software, IDC. Syngress has a long history of publishing market-leading books for system

administrators and security professionals on commercial security products, particularly Firewall and Virtual Private Network (VPN) appliances from Cisco, Check Point, Juniper, SonicWall, and Nokia (see related titles for sales histories). The Nokia Firewall, VPN, and IPSO Configuration Guide will be the only book on the market covering the all-new Nokia Firewall/VPN Appliance suite. Nokia Firewall/VPN appliances are designed to protect and extend the network perimeter. According to IDC research, Nokia Firewall/VPN Appliances hold the #3 worldwide market-share position in this space behind Cisco and Juniper/NetScreen. IDC estimated the total Firewall/VPN market at \$6 billion in 2007, and Nokia owns 6.6% of this market. Nokia's primary customers for security appliances are Mid-size to Large enterprises who need site-to-site connectivity and Mid-size to Large enterprises who need remote access connectivity through enterprise-deployed mobile devices. Nokia appliances for this market are priced from \$1,000 for the simplest devices (Nokia IP60) up to \$60,000 for large enterprise- and service-provider class devices (like the Nokia IP2450 released in Q4 2007). While the feature set of such a broad product range obviously varies greatly, all of the appliances run on the same operating system: Nokia IPSO (IPSO refers to Ipsilon Networks, a company specializing in IP switching acquired by Nokia in 1997. The definition of the acronym has little to no meaning for customers.) As a result of this common operating system across the product line, The Nokia Firewall, VPN, and IPSO Configuration Guide will be an essential reference to users of any of these products. Users manage the Nokia IPSO (which is a Linux variant, specifically designed for these appliances) through a Web interface called Nokia Network Voyager or via a powerful Command Line Interface (CLI). Coverage within the book becomes increasingly complex relative to the product

line. The Nokia Firewall, VPN, and IPSO Configuration Guide and companion Web site will provide seasoned network administrators and security professionals with the in-depth coverage and step-by-step walkthroughs they require to properly secure their network perimeters and ensure safe connectivity for remote users. The book contains special chapters devoted to mastering the complex Nokia IPSO command line, as well as tips and tricks for taking advantage of the new "ease of use" features in the Nokia Network Voyager Web interface. In addition, the companion Web site offers downloadable video walkthroughs on various installation and troubleshooting tips from the authors. * Only book on the market covering Nokia Firewall/VPN appliances, which hold 6.6% of a \$6 billion market * Companion website offers video walkthroughs on various installation and troubleshooting tips from the authors * Special chapters detail mastering the complex Nokia IPSO command line, as well as tips and tricks for taking advantage of the new "ease of use" features in the Nokia Network Voyager Web interface
